Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
August 16, 1986

Highlights

U.S. coal production in the week ended August 16, 1986, as estimated by the Energy Information Administration, totaled 17.86 million short tons (bituminous coal and lignite, 17.78 million short tons; Pennsylvania anthracite, .08 million short tons). This was 4.2 percent higher than in the previous week and was 3.6 percent lower than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through August 16, 1986, was estimated at 553.55 million short tons, 0.5 percent below the 556.46 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)), released for publication on October 15, 1984.

Figure 1. Coal Production

1. Coal Production

Production Carloadings	Week Ended			Year to Date Ended		
	08/16/86	08/09/86	08/17/85	08/16/86	08/17/85	Percent Change
Thousand Short						
Bituminous and Lignite	17,783	17,066	18,458	551,442	554,035	-0.5
Anthracite	78	75	79	2,113	2,421	-12.7
Total	17,861	17,140	18,536	553,554	556,457	-0.5
Loaded	117,942	112,870	123,845	3,580,118	3,634,254	-1.5

Bituminous coal.

1986 data are preliminary. Total may not equal sum of components because of independent

classification of American Railroads, Transportation Division, Weekly Statement CS-54A; Energy Information Administration, Form EIA-6, "Coal Distribution Report" and State mining agency coal production reports.

Table 2. Coal Production by State
(Thousand Short Tons)

Region and State	Week Ended		
	08/16/86	08/09/86	08/17/85
